EXPERIENCE

Full Stack Web Development Intern | [SuprMentr](#) · Remote

Feb 2026 – May 2026

- Designed MongoDB Atlas schemas and REST APIs for multi-user financial data — structured collections for fast aggregation queries, real-time retrieval, and consistent reads, directly applicable to data pipeline and ETL work.
- Built FinFlow, a MERN finance analytics dashboard with month-over-month trend tracking, category spending breakdowns, and budget threshold alerts — data flows end-to-end from MongoDB through Express APIs to live Recharts dashboards.
- Translated business requirements into technical features independently — scoped, designed, and shipped within Agile sprint cycles with full Git branching and PR workflow management.
- Implemented CSV export for filtered transaction datasets — mirrors real reporting and data delivery requirements for business stakeholders.

Associate Software Engineer Intern | [Accenture](#) · Bengaluru

May 2025 – Jul 2025

- Automated Excel-based data processing using Python scripts — cut manual effort by ~40% through ETL-style extraction, transformation, and structured output generation across enterprise datasets.
- Wrote 20+ PyTest unit tests for backend data modules — caught edge-case bugs before production and strengthened data validation and accuracy across the pipeline.
- Worked in an Agile team environment on enterprise-scale systems — applied structured delivery practices and earned certifications in Generative AI, RPA, and Cybersecurity.

PROJECTS

FinFlow — Personal Finance Analytics Dashboard | [Live](#) | [GitHub](#)

Feb 2026 – May 2026

Tech: React (Vite), Node.js, Express.js, MongoDB Atlas, Recharts, JWT

- Designed the data layer for a full-stack finance platform — MongoDB Atlas collections structured for fast aggregation, budget threshold reporting, and month-over-month trend queries.
- Deployed on Vercel + Render with full auth, dark/light mode, and production UX — live application serving real financial data to users.

IPL Player Performance Analytics | [GitHub](#)

Mar 2026

Tech: Python, Pandas, Matplotlib, NumPy

- Analysed multi-season IPL datasets (batting averages, strike rates, bowling economy) using Pandas — applied EDA best practices including outlier detection, null handling, and feature distribution analysis.
- Built a full analytics pipeline from raw CSV ingestion to final visualisation — handled data quality and transformation at each stage before passing clean data to analysis.
- Built Matplotlib dashboards to surface performance trends and cross-team comparisons — translated raw statistics into stakeholder-ready visual insights.

AI Powered Automated Resume Screening System | [Journal](#) | [GitHub](#)

Apr 2025 – Jan 2026

Tech: Python, Flask, spaCy, scikit-learn, Pandas

- Built an end-to-end NLP data pipeline using spaCy to extract structured fields from unstructured resume text and automatically match them to job descriptions — replacing a fully manual process.
- Trained a scikit-learn model achieving 90% keyword extraction accuracy across 50+ test resumes — evaluated using precision/recall metrics; managed full ML lifecycle from preprocessing through deployment.
- Designed the data flow to handle noisy, inconsistent text inputs — applied cleaning, normalisation, and feature engineering before model inference.

TECHNICAL SKILLS

Data & Analytics: Python (Pandas, NumPy, SciPy), SQL, MySQL, Excel, Google Sheets

Visualization & BI: Matplotlib, Seaborn, Power BI, Recharts

Machine Learning: scikit-learn, TensorFlow, regression, classification, model evaluation, feature engineering

Cloud & Infrastructure: Google Cloud Platform (GCP), AWS fundamentals, MongoDB Atlas, Vercel, Render

NLP & AI: spaCy, NLP pipelines, keyword extraction, text preprocessing, Generative AI

Backend & Dev Tools: Flask, REST APIs, Node.js, Git, GitHub, GitLab CI/CD, Agile, SDLC, DBMS, RDBMS, Data Structures & Algorithms

EDUCATION

B.E. in Computer Science & Engineering (Honours)

Rajarajeswari College of Engineering, Bengaluru

CGPA: 9.34 / 10

2022 – 2026

ACHIEVEMENTS & CERTIFICATIONS

- ZS Scholars Program** — selected by ZS Associates for academic distinction and data-driven problem-solving aptitude
- VTU Elite GOLD** — [Machine Learning](#) · [Natural Language Processing](#) — VTU COE 2026
- Infosys Foundation STEM Scholarship** — Top 5% of engineering students nationally — selected for academic excellence
- Reliance Undergraduate Scholarship** — National merit-cum-means award for academic performance
- GCP Ultimate Legend Tier** — Top 5% · 300+ labs · 100+ badges — [Google Cloud Skills Boost Arcade Program](#)
